RE: Toxic Release Inventory

Dear Mr. Goldstein,

In reviewing our usage for ammonia for 2007, COS Samoa Packing Company purchased 6,920 pounds of ammonia in total.

Calculation:

17,000 lbs in the tanks + 6,920 pounds of ammonia purchased in 2007 – 17,000 in the tanks December 2007 = 6,920 pounds of ammonia usage

Based on the calculation, COS Samoa Packing Company falls short of the threshold requirements for requirements to submit the 2007 TRI.

Please be advised Samoa Packing Company will not submit the 2007 TRI report.

Sincerely,

Willem Martins, General Manager
COS Samoa Packing Company
